Tiger 800 XR

₹ 10,50,000.00 [†]

PRODUCT INFORMATION

OVERVIEW

The adventure. It's about more than the route you take. It's about the stories you bring back. On the Tiger 800 XR, you'll bring back plenty.

With cast wheels, 19" front wheel, hydraulically adjustable Showa monoshock suspension and a torque-laden 95 PS 800cc triple engine the XR is ideally suited both for long road adventures and every-day functionality. Rider technology comes as standard with ride-by-wire throttle for improved response and feel, Triumph Traction Control and switchable ABS. Together with a chassis designed to exploit every ounce of torque from the triple engine and adjustable seat height for excellent comfort: you have the perfect machine to tackle the day ahead. Adventure riding has a new pioneer.

ENGINE

Triple Engine

The new Tiger features a liquid-cooled, 800cc in-line-three cylinder engine, delivering 95PS and 79Nm of torque for power across the entire rev range and the distinctive Triumph triple sound and character.

Fuel Efficiency

The Tiger XR has a 17% improvement in fuel efficiency on the EU 'mixed cycle' which means that fuel economy improves from 55mpg to 65 mpg versus the outgoing Tiger giving a potential range of 272 miles.

Gearbox

The gearbox has been updated with the selector mechanism derived directly from the class leading Daytona, for quicker smoother shifts.

ENGINE	
TYPE	Liquid-cooled, 12 valve, DOHC, in-line 3-cylinder
CAPACITY	800cc
BORE	74.05 mm
STROKE	61.94mm
SYSTEM	Multipoint sequential electronic fuel injection
EXHAUST	Stainless steel 3 into 1, high level stainless steel silencer
FINAL DRIVE	O ring chain
CLUTCH	Wet, multi-plate
GEARBOX	6-Speed
OIL CAPACITY	3.7L

CHASSIS

Suspension

The XR models have Showa suspension, calibrated to ensure excellent handling on any surfaces. The front suspension is a 43 mm Showa USD fork, now anodised black, while the rear suspension includes a Showa mono-shock which is adjustable in preload for 2-up touring.

Handling

The handling balance of the Tiger is what really sets it apart with exceptional precision, agility, and control for the most spirited of ride.

Improved Braking

Latest generation switchable ABS comes as standard on the Tiger XR, along with insulated Nissin front brake pads for improved braking performance.

Wheels

The 19" Front and 17" Rear, cast aluminium rims help give the Tiger XR excellent road manners.

Frame

The stiff, tubular trellis frame with a new titanium powder coat provides resistance in extreme riding conditions.

Rider and Passenger Comfort

The new rad cowls have been redesigned to deflect the hot air from the radiator away from the rider. The standard high screen offers excellent wind protection.

Ergonomics

The riding position of the new Tiger has been updated with repositioned handlebars for greater riding comfort and an adjustable riders seat.

CHASSIS	
FRAME	Tubular steel trellis frame
SWINGARM	Twin-sided, cast aluminium alloy
FRONT WHEELS	19 x 2.5in, 10-spoke cast aluminium alloy
REAR WHEELS	17 x 4.25in, 10-spoke cast aluminium alloy
FRONT TYRES	100/90-19
REAR TYRES	150/70 R17
FRONT SUSPENSION	Showa 43mm upside down forks, 180mm travel
REAR SUSPENSION	Showa monoshock with hydraulically adjustable preload, 170mm rear wheel travel
BRAKES FRONT	Twin 308mm floating discs, Nissin 2-piston sliding calipers, Switchable ABS
BRAKES REAR	Single 255mm disc, Nissin single piston sliding caliper, Switchable ABS
FRONT BRAKE MASTER CYLINDER	Nissin master cylinder, 14mm diameter
